

Appendix 4: Scientific production (peer reviewed in international journals)

The following referencing has been adopted: **[T1-n]** for the regular peer reviewed articles of team 1 etc, **[CSP-n]** for the production involving members of different teams (Common Scientific Production). The corresponding publications authored by researchers appointed since Jan. 1st 2013 before they joined LPTMS are gathered under **[P-n]** and finally **[T1-Mn]** stands for the proceedings, chapters in books, etc, of team 1. Proceedings and book chapters are referenced separately. Articles in bold font are arguably among the 20% deemed most significant.

Team 1 – Condensed matter and quantum fluids

[T1-1] Boudjemaa A. ; Shlyapnikov G.V.

Strong-coupling theory of counterions between symmetrically charged walls: from crystal to fluid phases
Article view of the companion title picture that allows to get forward an analytical equation of state for strongly interacting charged-particle mixtures. Our analysis, that significantly extends the range of accuracy of recent equations of state, covers both bulk as well as cylindrical structures of counter-ions in the vicinity of the charged interfaces.
