

The Institutes for Theoretical Physics at the University Tübingen, the Institute for Complex Quantum Systems, and the Institute for Quantum Optics at Ulm University, are looking to fill

## **Three PhD Positions in Quantum Metrology,**

two of them theoretical and one experimental (up to 66% of E13 TV-L positions) in the groups of Profs. Braun (Tübingen, theory), Ankerhold (Ulm, theory), and Jelezko (Ulm, experiment), respectively. The positions will be offered for 36 months and will have as topic theoretical investigations and experiments in quantum metrology based on NV centers. The project is part of the newly established Competence Network for Quantum Technology BW funded by the Baden-Württemberg Stiftung.

We are looking for highly motivated candidates with excellent analytical skills and a strong working knowledge in quantum mechanics. The ideal candidate for the theory positions will have in addition previous working experience in solid state systems or quantum metrology.

[University Tübingen](#) is one of the Excellence Universities in Germany. It is home to a vibrant research community with very strong research activity in the quantum sciences. Ulm University provides with the Center for Integrated Quantum Science & Technology IQ<sup>ST</sup> (together with U Stuttgart and the Max-Planck-Institute for Solid State Research) an internationally competitive research environment for quantum science with strong ties across disciplines.

We support an open research culture, where original thinking and academic merit are encouraged and nurtured, and encourage applications from all nationalities, backgrounds, and genders.

Interested candidates are asked to send a CV (including a list of publications) and a transcript of academic records to [daniel.braun@uni-tuebingen.de](mailto:daniel.braun@uni-tuebingen.de), and arrange for two letters of recommendation to be sent to the same address. Disabled persons will be preferred in case of equal qualifications. The Universities Tübingen and Ulm seek to raise the number of women in research and therefore urges qualified women to apply.

Application deadline is January 31, 2021.
